Catalog description:

This course provides an introduction to forensic psychology. Students will understand how the fields of psychology and law intersect in individual and public policy domains. Topics covered include roles of forensic psychologists, criminal responsibility and competence to stand trial, malingering, and trial consulting.

Purpose: 1. For Whom (generally?)

The course provides an introduction to forensic psychology, the application of psychology to the legal system. Students will learn roles of forensic psychologists (applied and research careers), distinctions between forensic and correctional psychology, seminal case law pertaining to U.S. legal standards (e.g., competence to stand trial,

criminal responsibility, scientific evidence admissibility standards), and relevant clinical constructs (e.g., the science of violence risk assessment, psychopathic personality).

Rationale: This course is designed primarily for psychology majors and minors who are interested in the application of psychology to the legal realm and who are potentially considering advanced graduate studies and/or careers in forensic psychology. Students in associated disciplines (e.g., Sociology, Pre-Law) will likely also be interested in this course. The course will add an additional Psychology Department elective.

2. What should the course do for the student?

Through this course, students will have the opportunity to gain an understanding of how the fields of psychology and law intersect in individual, social, and public policy domains. Specifically, course material will encompass seminal case law influenced by contributions from psychology as well as the impact of psychological testing, evaluation, and research on the ever-evolving U.S. legal system. Information will also be presented regarding the distinctions between forensic and correctional psychology and career paths associated with each professional realm.

Teaching method planned: Lecture, class discussion, class demonstrations

Textbook and/or materials planned (including electronic/multimedia):

Greene, E., & Heilbrun, K. (2013). *Wrightsmen's Psychology and the Legal System* (8th Ed.). Belmont, CA: Wadsworth.

Additionally, assigned readings and materials will include relevant journal articles and multimedia (e.g., news outlets; youtube) videos and articles.

Course Content: (Please also see the attached syllabus.)

Topics to be covered in this course include:

- Introduction to Forensic Psychology—This introductory section of the course will explore the following questions to set the stage for subsequent lecture topics: What is forensic psychology? What is forensic psychology *not*? What criteria are used by judges to evaluate and render rulings on the admissibility of psychological evidence? What are characteristics of sound scientific research?
- Forensic Assessment—Information will be presented regarding the various types of psychological assessment evaluations conducted by forensic psychologists and their role in civil and criminal proceedings. Distinctions between forensic (primarily applied vs. primarily research) and correctional psychology career paths will also be outlined.
- The Trial Process—Lectures will focus on the major components of the trial process, emphasizing psychological theories contributing to each. Questions addressed will include the following: How are juries selected? What

psychological theories inform the jury selection process? What is trial consulting, and what role does psychology play in that process? What research exists regarding the accuracy of eyewitness identification and testimony? What are the prevailing legal rulings regarding child eyewitness testimony?

- Competence and Insanity—A brief review of severe mental illness disorders will set the stage for lectures on the following questions: What is competence to stand trial? How is it evaluated? What are the legal standards for determining competence? What does it mean to plead Not Guilty by Reason of Insanity? How are criminal responsibility evaluations conducted? What is the difference between ultimate and penultimate expert testimony, and under what circumstances is either admissible or defensible? How do psychologists evaluate whether someone is feigning psychological symptomatology?
- Psychopathy—Lectures will be devoted to research on psychopathic personality, a disorder legally mandated to be assessed in some criminal proceedings, including current research and debates about the core features of this disorder.
- Violence Risk and Punishment—The final sections of the course will address the following questions: How do psychologists evaluate risk for future violence? What assessment instruments are used to evaluate violence risk? What does the research literature reflect about the relative predictive accuracy of violence risk assessment? What theories support criminal punishment? What prevailing case law exists regarding capital punishment?

Explores current and historic American family trends, how society and various social institutions shape the family, and the internal dynamics of the family as a social group in society. Current sociological research on these issues is utilized to inform class lectures.

Required Textbook

Cohen, Philip N. 2015. *The Family: Diversity, Inequality, and Social Change*. New York: Norton.

****This book is required. Information from the book not covered in lecture will appear on your exams.**

Course Objectives

1. Use sociological theories and research to better understand family patterns and trends.
2. Understand the various changes and patterns that have occurred in American families over time, including the changing roles of men, women, children, and elderly family members.
3. Learn how social forces (i.e., the economy, culture, politics, and the legal system) shape the family as a social institution and individual family members.
4. Gain knowledge of family issues that are of current interest, such as child well-being and the parent-child relationship, gender roles and division of household labor, divorce, stepfamilies, and social class and race.
5. Understand the diversity of American families and how race, social class and gender matter.

Course Requirements

Your grade for this course is based on points. You may earn up to 400 points in this course.

1. **EXAMS:** You will have THREE exams consisting of 40 multiple choice questions (including true/false questions). Each question is worth TWO points for a total of 80 points. You will also have TWO short answer questions worth 10 points each for a total of 20 points. Each exam is worth 100 points. **All THREE exams are worth a total of 300 points.**

2. **GROUP PRESENTATION:** You will participate in a 10 minute group presentation on a topic of interest that pertains to the family. The group will decide on the topic, and each group must have a different topic. Example topics may include: same-sex families, health care and the family, working mothers & maternity leave, stay at home fathers, reproductive technology, adoption, etc. There will be a total of 7 groups with approximately 4 students. The instructor will choose the groups. Each student must have a speaking role during the group presentation. **The group presentation is worth 50 points.**

Each student will receive their own grade based on the following:

- Attendance during the days you are to work in groups. If you are absent on a day you are to work in your group, you will lose 5 points off your grade for each day you are absent.
 - You will have the opportunity to evaluate the performance of your peers in your group. However, these evaluations will only account for 10% of your total presentation grade.
 - Your role in your group presentation as observed by the instructor during days you are to work in your groups.
 - Your portion of the group presentation (graded by the instructor).
3. **APPLICATION PAPER:** You will write a five page paper connecting a movie (choose ONE from the list below) on families to the course material. Each paper should be double-spaced with 1 inch margins. First, select ONE theoretical perspective that applies to the family relationships in the movie. Discuss why this perspective best applies to the family in your chosen movie. Second, link the movie to the course material – textbook, discussions, and lectures – by using specific examples from the movie to illustrate the family as examined through a sociological lens. Third, is this movie a good illustration of the family based on what you have learned from this course? Why or why not? Your paper should have an introduction and a conclusion. Further instructions will be given in class. **The application paper is worth 50 points.**

Each student must choose a different movie. There will be a sign-up sheet posted to my office door. You will be alerted when I post the sign-up sheet, and it will work as a first come, first serve. If you do not sign-up or select a movie, I will not accept your paper. I strongly suggest selecting a movie from one of the titles below. However, if you have a different movie in mind, you must see me first before using it to write your paper.

Thus, you must be present in class in order to complete class assignments. Class assignment make-ups will not be given.

Presentation of Research (50 points total): You are required to give a **7 minute** presentation of your research. Your presentation will include PowerPoint slides. These presentations will be given at the end of the semester (see course calendar for dates). Presentations will include an introduction, a discussion of your literature review and hypotheses, methodology, summary of demographic data, statistical analyses used in your research, your findings, and a conclusion. Presentations that are not 7 minutes will be docked points. Further instructions on how to deliver your presentation will be distributed at a later date.

Research Paper (100 points total): The final requirement is a research paper that consists of an introduction, literature review, a methodology section, results and discussion/conclusion. The paper should be approximately 12 pages and must include a title and reference page. All papers must be typed with one inch margins. A 12-point font must be used. Catalog description:

Professional Development (3, 2, or 1) F, S, SU. Professional development in various strategies and techniques to enhance delivery of mental health services for a variety of disciplines including but not limited to psychologists, school psychologists, mental health counselors, social workers, guidance counselors, etc. Courses are scheduled at the request of local school districts, educational agencies, consortia, mental health counseling centers, community agencies, and the like, but are subject to the approval of the university. Graduate institutional credit (institutional credit means that the hours earned and the grade points are included only in the semester totals, which reflect total hours and

credits earned. Neither the grade points nor the hours earned are reflected in the cumulative totals, which reflect total hours and credits toward degrees) may be earned, but PSPD 525 cannot be applied toward the any of graduate programs at FMU.

Purpose:

Mental Health professionals in South Carolina are required to complete varying degrees of continuing education, depending on their specialty. For instance, school psychologists are required to have 120 continuing education requirements in 5 years. One graduate semester credit equals 20 continuing education contact hours, so six graduate credit hours would fulfill that requirement. For three years now, the Psychology Department has offered conferences, but only CEU's have been offered. This would allow us to offer graduate credit as a choice.

Teaching method planned:

Teaching methods are aimed to be related to the needs of the students who are enrolled in the course. However, generally, role plays and lecture will be utilized to cover content.

Textbook and/or materials planned (including electronic/multimedia): No textbook is required; media will be selected per the presenter's requirements.

Introduction:

Child Development as an area of study overlaps many other subjects, e.g. Biology, Nutrition, Language Studies, Psychology and Sociology. The care and nurture of children is both an art and a science. The study of child development must therefore endeavor to embrace an interdisciplinary approach. Most students will already have a considerable knowledge of many issues in development before receiving any specific teaching during this course. This awareness is built up in their family, wider kin network, from neighbors, communities and media sources. There is great scope for extending this knowledge and experience through a structured syllabus that encourages understanding of both major and minor aspects of the developing child.

Accommodations and Modifications:

Americans with Disabilities Act: The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. The Professor supports the ADA, but also must know of any necessary accommodations on her part in order to provide them or to facilitate your progress in the class.

Students with Special Needs: Any students, who could require assistance in the event of a necessary evacuation of the building in which this class is taught, are asked to notify the Professor so that individuals can be identified to assist him/her during an evacuation.

Required Texts:

Reeves, M. A., Nickerson, A. B., Conolly-Wilson, C. N., Lazzaro, B. R., Jimerson, S. R., & Pesce, R. C. (2011). *PREPaRE: Workshop 1: Crisis Prevention & Preparedness: Comprehensive School Safety Planning*. 2nd ed. Bethesda, MD: National Association of School Psychologists.

Long Term Goals:

The aims of the curriculum are the same for all students. They are not listed in order of priority. The course may well lay the foundations of further studies beyond these aims. It therefore aims to enable students to:

1. Identify four characteristics of a crisis event.
2. Identify the key concepts associated with the PREPaRE acronym.
3. Describe the four activities of the school crisis team.
4. Understand the importance of hierarchical crisis team structure and response.
5. Identify the five major functions of the Incident Command System (ICS).

6. Identify strategies for communicating with school boards to use when trying to create or sustain teams.
7. Identify three concepts related to crime prevention through environmental design.
8. Identify guiding principles in crisis plan development.
9. Identify essential components of crisis plans.
10. Identify key concepts from the workshop that their crisis team needs to learn/address to be adequately prepared for crisis situations.

Course Requirements and Grading Policy:

(10%) Attendance: If a student is absent more than ½ day no credit will be given.

(80%) Quizzes: A pre-test and a post-test will be given. Only the post-test grade will be counted toward the final grade.

(10%) Course Evaluations: Every student is provided the opportunity to evaluate each presentation and its presenter so that educational quality may be maintained and enhanced. All students are encouraged to respond to the evaluation with honesty, sincerity, and a sense of confidentiality.

Other Course Policies:

Cell Phones: Cell phone use (of *any* kind – voice, texting, calculator, photography...) is banned during class. Phones must be rendered *inaudible* (either turn them off completely or at least set them not to make noise) during class time.

Scholastic Dishonesty: As commonly defined, plagiarism consists of passing off, as one’s own the ideas, words, and writings, etc., that belong to another. In accordance with this definition, you are committing plagiarism if you copy the work of another person and turn it in as your own, even if you have the permission of that person. Plagiarism is one of the worst academic sins, for the plagiarist destroys the trust among colleagues without which research cannot be safely communicated. *Students suspected of scholastic dishonesty or found to be involved with scholastic dishonesty will be reported to the Dean of Students and will ultimately not only fail the assignment or test, but also the course.* If you have any questions regarding plagiarism, please consult the current issue of the Francis Marion University Student Handbook, under the section, “Academic Integrity.”
