

Agenda
Faculty Senate Meeting
September 23, 2008 – UC 218 – 3:45 p.m.

I. Roll Call

II. Approval of Minutes

III. Reports from Committees

A. Executive Committee

B. Academic Affairs

- 1. Item I from the Department of Education concerns changing the collateral requirement to a concentration requirement for Elementary Education Majors, as well as the addition of EDUC 555, Teaching Children of Poverty.**
- 2. Item II from the Department of English, Modern Languages, and Philosophy concerns the addition of SPAN 220, Spanish for Health Care.**
- 3. Item III from Military Science: Army Reserve Officers Training Corps (ROTC) Program concerns the reinstatement of the program at Francis Marion University bringing past course descriptions in line with current military standards.**

IV. Old Business

V. New Business

VI. Announcements

VII. Adjournment

I. Proposal from the School of Education:

A. **CHANGE**, on page 165, of the catalog under **Elementary Education B.S.** degree in Elementary Education requires the following

FROM:

Collateral (Approved by academic adviser) 12 hours

TO:

Concentration 8 – 9 hours

This concentration requires 8 (two four hour courses) or 9 (3 three hour courses) hours of additional coursework (beyond general education requirements and support courses) in one of the following areas of concentration:

- a. Science (2 courses) – (Select from physical and/or biological science.)
- b. Social Studies (3 courses) – (Select from history, political science, geography and/or economics.)
- c. Math (3 courses) – (Select from above Mathematics 130, Mathematics 170, 270, and 370 will not count as part of this concentration.)
- d. English (3 courses) – (Select from above English 200 literature and/or writing courses.)
- e. Foreign Language (3 courses)

Rationale: We believe that elementary education majors should have additional content work related to the major content areas.

2. The current collateral structure just doesn't work for many of our students. "Double dipping" with credits obtained from general education allows students can obtain collateral with as little as one additional course.

3. We have added Foreign Language to the four traditional disciplines. This addition will allow candidates to gain competence in communication with students who are non-native English speakers.

B. **ADD**, on page 172, of the current catalog the following:

EDUC 555 Teaching Children of Poverty (3) (Prerequisites: EDUC 311 or permission of the School)

This course and its required clinical experiences are designed to provide teacher candidates with in-depth study of issues related to teaching children of poverty. It includes collaborative research activities and the use of existing research evidence in the areas of the culture of poverty; the classroom community; family and community partnerships; curriculum design, instructional strategies and assessment; relationship-driven classroom management; and

teachers as learners, leaders and advocates to improve curriculum, instruction, and assessment in schools serving large numbers of children of poverty. This course is required for all Center of Excellence Scholars. Designation of credit as undergraduate or graduate must be made at registration. Freshmen, sophomores, and juniors may not take 500-level courses.

Rationale: This course is designed to be the capstone requirement of the *FMU Center of Excellence Scholars* program which has been developed to better equip FMU teacher candidates for future work with children of poverty by encouraging them to voluntarily pursue an intensive study of the characteristics and needs of those children during their teacher preparation.

II. Proposal from the Department of English, Modern Languages, and Philosophy:

A. ADD, on page 98, of the current catalog, the following:

220 Spanish for Health Care (3) (Prerequisite: 102 or permission of department)

An intermediate Spanish course targeting the health care professions, Spanish 220 aims to equip the student with the necessary communicative skills in Spanish to assist non-English speaking Hispanic patients. As an integral part of the course, a service-learning project will provide the student with the opportunity to gain real-life experience through serving the surrounding Hispanic communities.

NOTE: This course is not part of the four-semester General Education requirement.

Rationale: A Spanish course targeting the health care professions will equip our nursing, Spanish, sociology, psychology, and pre-med majors with the necessary communicative skills in Spanish to assist non-English speaking Hispanic patients. In a traditional Spanish language course (101-202), students are exposed to a variety of themes and contexts in order to gain broad-based knowledge and basic functional use of the target language. “Spanish for Health Care” will be unique in that its primary objective will be to offer students the opportunity to focus on the Spanish language within specific contexts related to health care. As an integral part of the course, a service-learning component will provide students with the opportunity to gain real-life experience through serving the surrounding Hispanic communities.

NOTE: This course is offered at an intermediate level to allow students pursuing a B.S. degree in a health-related field the opportunity to take an applied language course without the four-semester General Education requirement for the B.A.

III. **Proposal from the Military Science: Army Reserve Officers Training Corps (ROTC) Program:**

CHANGE, on pp. 180-181 of the 2007-2008 Catalog, under the MILITARY SCIENCE: (ROTC) PROGRAM

FROM:

ARRANGEMENT IN MILITARY SCIENCE: ARMY RESERVE OFFICERS TRAINING CORPS (ROTC) WITH THE UNIVERSITY OF SOUTH CAROLINA

Coordinator: Darryl L. Bridges

The Army ROTC program provides basic leadership and military skills resulting in the commissioning of college graduates as Second Lieutenants in the United States Army, Army Reserve, and Army National Guard. Francis Marion University is an affiliated university with the Army ROTC program located at the University of South Carolina. This arrangement offers an opportunity for FMU students to participate in Army ROTC. Freshmen and sophomores take the Military Science Class (MSC) 101-102 and Military Science Class (MSC) 201-202 respectively. These courses are open to full-time students, are taken for elective credit, and incur no military obligation. Qualified juniors and seniors taking Army ROTC who sign contracts may earn commissions upon completion of program requirements and graduation. Juniors attend the Leadership Development and Assessment Course during the summer between their junior and senior years. Juniors and seniors take MSC 301-302 and MSC 401-402 respectively. A two-hour leadership laboratory is also required for both the basic and advanced Military Science classes.

FMU students who wish to enroll in Military Science classes must apply to the University of South Carolina as non-degree seeking special students and enroll in Army ROTC courses at USC. They must attend combined class and lab sessions in Columbia, engage in physical fitness training, maintain a minimum GPA of 2.0, and remain in good academic standing at Francis Marion University.

MILITARY SCIENCE AND LEADERSHIP (MSL)

101 Fundamentals of Military Science (2) An introduction to the mission, organization and history of ROTC: Military and civilian obligation in relation to National Security; Individual Arms and Marksmanship Techniques, Emergency Medical Treatment. The students will receive information that will help them understand and prepare military correspondence (the Army Writing Style). Leadership Laboratory training to include thorough indoctrination in military courtesy and customs of the service, drill experience, development of initiative and self-confidence.

102 Introduction to the Army (2) A discussion of the mission and responsibilities of the United States Military Forces in support of National Security with emphasis on the role of the individual, participating citizen. Students will be introduced to Map Reading Techniques. Leadership Laboratory is a continuation of MSC 101 Laboratory.

201 Fundamentals of Military Leadership (3) A detailed study of the applicability of leadership principles, traits, and techniques in all job areas. Additionally, an appreciation is developed for leadership counseling techniques. The organization of the Army culminates this course.

202 Fundamentals of Military Decision Making (3) A detailed study of orienteering to include basic fundamentals of map reading, grid systems, scale and distance, elevation and

relief, military symbols, direction and location, and utilization of the declination diagram. Additionally, students will discuss the code of conduct, the principles of war and reinforce preparation of military correspondence. Leadership Laboratory is a continuation of MSC 201 Laboratory.

101L/102L/201L/202L Basic Leadership Laboratory - Leadership Lab is in conjunction with MSC 101, 102, 201, 202. It is a period which supplements and reinforces, through practical application, the fundamentals taught in each of the Military Science classes. Leadership Lab is a progressive learning experience designed to produce effective and efficient Second Lieutenants for the United States Army.

301 Advanced Military Decision Making (4) How to prepare and conduct military training, to include presentation and communication techniques. Included in this phase of instruction is a 10-minute oral presentation, how to cope with basic problems, i.e., discipline and motivation, encountered in small units, leadership training designed to further develop planning and organizational skills, fundamentals of offensive and defensive tactics of war.

302 Applied Military Leadership (4) A review of the principles and fundamentals of small unit tactics, and the application of the principles of offensive and defensive combat to units of the infantry battalion. Familiarization with characteristics, operation and employment of small unit weapons, communication systems and equipment, and continued development of selected Military Skills. Orientation relative to administrative procedures, required standards of performance, and general conduct of training at Warrior Forge, the Leadership Development and Assessment Course. Continuation of Leadership Laboratory Training conducted in MSC 301.

301L/302L Advanced Leadership Laboratory - Leadership Lab is in conjunction with each of the aforementioned MSC 300-level classes in the advanced course. It is a period which supplements and reinforces, through practical application, the fundamentals taught in each of the Military Science classes. Leadership Lab is a progressive learning experience designed to produce effective and efficient Second Lieutenants for the United States Army.

401 Leadership and Management Seminar I (4) Leadership management and professional Command and Staff and Unit meetings, how to prepare military correspondence, ethics and professionalism, military justice.

402 Leadership and Management Seminar II (4) Management simulation exercise and Active Duty orientation, small unit effectiveness and Army Training Management, the U.S. Army Logistics system, interpersonal skills, counseling techniques, and personnel evaluation, the Law and Principles of War, Code of Conduct and Geneva Convention, customs and courtesies of an Army officer

TO:

MILITARY SCIENCE: ARMY RESERVE OFFICERS TRAINING CORPS (ROTC)

Coordinator: Capt. Chad M. Jones

Faculty: Lt. Col. Charles H. C. Brown, Capt. Chad M. Jones

Overview

Army Reserve Officer Training Corps (ROTC) is a coeducational program dedicated to developing college-educated men and women to serve in challenging positions of leadership, responsibility, and varied managerial positions both as officers in the U.S. Army and civilians in corporate America. Army ROTC requires from two to four years to complete, depending on

student qualifications. This time is normally divided into a two-year basic program comprising freshman and sophomore students and a two-year contractual advanced program for juniors and seniors. Students with prior military service, JROTC, or National Guard/Reserve service may qualify for direct placement in the advanced program. At the beginning of the junior year, students with two years remaining before graduation may also qualify for the advanced program by attending Leadership Training Course (LTC), a four-week course offered during the summer at Fort Knox, Kentucky. All students participate in a regular program of physical fitness and field training.

There is no major, minor or collateral in Military Science.

The Scholarship Program

The Army ROTC Scholarship Program awards four-, three-, and two-year scholarships to eligible students on a competitive basis. Applications for three- and two-year ROTC scholarships are accepted year-round. Nursing students who have qualified for placement in the advanced course may also apply for two-year scholarships. Students do not have to be enrolled in ROTC to apply for three- and two-year scholarships.

The scholarship amount is applied to the cost of tuition. An additional amount of \$1,200 is awarded for books and supplies. The students also receive a tiered allowance of \$300, \$350, \$450, or \$500 per month for up to 10 months of each school year depending on their academic status, i.e., freshman, sophomore, junior, or senior. All students receive \$700 while attending the five-week Leader Development and Assessment Course at Fort Lewis, Washington, after their junior year.

Leadership Training Course (LTC) Two-Year Program

LTC is for students who missed the first and second years of ROTC. LTC is attended during the summer between the sophomore and junior years of college for four weeks at Fort Knox, Kentucky. The purpose of LTC is to provide instruction in basic leadership and technical skills that will prepare you for your junior and senior years of ROTC. During this camp, you have the opportunity to compete for a two-year scholarship. All travel expenses are paid and students are paid \$700 while attending the course. Students attending this camp incur no military obligation.

Cadet Professional Development Training

Selected cadets may have the opportunity to attend Air Assault School, Airborne School, Mountain Warfare School, Northern Warfare School, and/or Scuba School. All training is voluntary and conducted at Army posts throughout the United States during either summer or winter recesses.

Cadet Troop Leader Training

Selected cadets are sent to various Army units in the United States and overseas to develop leadership experience prior to the beginning of their senior year. Cadets are paid and receive all privileges and status of Army officers.

Simultaneous Membership Program (SMP)

The Simultaneous Membership Program is a program in which the individual is both a member of the Army National Guard (ARNG) or the U.S. Army Reserve (USAR) and Army ROTC. Students receive entitlements from both the ARNG or USAR and ROTC.

This is a required program for cadets who are in the ARNG or USAR and are in the advanced course. When cadets enter the SMP, they become officer trainees in their guard or reserve unit and are paid as sergeants (E-5), while performing duties commensurate with the grade of second lieutenant.

Professional Military Education Program

The Army ROTC Professional Military Education (PME) program exists to enhance the career development and performance of cadets as future Army officers. The PME guidelines for Army ROTC cadets are as follows:

1. All cadets must successfully complete a course in American military history prior to commissioning.
2. All cadets are encouraged to take a course from each of the following areas prior to commissioning: human behavior, math reasoning, management, and national security studies.

Students will meet with the professor of military science/class advisor before selecting these courses.

MILITARY SCIENCE AND LEADERSHIP (MS)

101 Fundamentals of Military Science (2:1-2) Development of leadership, management, and communication skills. Map reading, land navigation, and study/time management techniques.

102 Introduction to the Army (2:1-2) History, organization, mission, and role of United States Army in national defense. Components of total Army structure. Emphasis on group dynamics and communication skills.

201 Fundamentals of Military Leadership (3:2-2) Oral and written military communications, planning, and organizing techniques. Current military leadership doctrine and application. Combined arms concepts, organizations, and tactics.

202 Fundamentals of Military Decision Making (3:2-2) Soldier skills, including map reading and land navigation. Introduces Army troop-leading procedures through practical exercises and principles of war using historical events.

301 Advanced Military Decision Making (4:2-2) Small group leadership through practical applications. Individual leadership skills with emphasis on problem analysis, decision formulation, and steps of decision making.

302 Applied Military Leadership (4:2-2) (Prerequisite: 301 or permission of Military Science Program) Continues development of leadership competencies and confidence. Tactical training exercises to enhance leadership development.

401 Leadership and Management Seminar I (4:2-2) (Prerequisite: 301 or permission of Military Science Program) Current Army leadership, tactical, and training doctrine. Military law in context of peacekeeping/enforcement operations. Overview of Army's role in joint operations.

402 Leadership and Management Seminar II (4: 2-2) (Prerequisite: 401 or permission of Military Science Program) Application of current Army leadership, tactical, and training doctrine. Evolution of military professionalism; civil-military relations, personal and professional ethics, and military justice system.

406 United States Military History (3) (Same as History 406) (Prerequisite: one 200-level history course or permission of Military Science Program) Study of military institutions and the military experience in American history from the Revolution to the present. Topics include causes, conduct, and consequences of war; impact of politics, diplomacy, and technology upon the armed forces in peace and war; and reforms within the armed forces.

RATIONALE:

NOTE: With the exception of MSC 406 (which was approved by AAC on April 3, 2008), the above courses are modifications of the Military Science Program as on file from when last offered by Francis Marion University and as appeared in the 1995-96 Catalog (see below). They are NOT modifications of the courses under "**FROM:**" which were offered by the University of South Carolina through an agreement with Francis Marion University. The purpose of this proposal is to modify the older courses (1996) to be more consistent with the most recent courses as offered through agreement with the University of South Carolina Military Science Program (2007).
