Week of November 13, 2017

Quotientdoku: The following puzzle is completed like ordinary Sudoku. Fill in the cells so each row, column and three-by-three square cage contains the numbers 1 through 9 exactly once. In addition, the clue on the line between two cells represents the quotient when the larger number is divided by the smaller. (Recall, the quotient of 7 and 3 is 2 with a remainder of 1)

-1 -1 -1 -1 -1 -1 -1 -1			-6-1 7-3-3	-1- 3	2-2-
	-3 - 3 - 4 -1 - 6 - 1 7 - 5	-2- -1-			
1 3 -1 -2 -2 - 2 1 -8 -1 -1 -1			-4-1 2 -3-1 2	1-	-6- -9-
