## Selected Bibliography of African American Titles

### History of the African American Collection

This guide serves to highlight the African American Collection at the James A. Rogers Library related to the study of African American history, people, and culture. The intention of the guide is to provide the researcher with suggested print, audiovisual, and electronic resources about and by African Americans.

The guide is divided into six different categories. Each is designed to give the researcher ideas on how to track down material relating to the African American experience.
