Create a Test or Assignment

There are several different types of assignments that can be created within Blackboard. For this tutorial, we are going to focus on the quickest and easiest to use.

Regardless of the assignment type, make sure that Edit Mode is “On” and that you have selected the “Content” folder.

Paper Assignment

One of the easiest types of assignments to create is one where students simply upload a document for grading. This can be a paper that is assigned or it can be a worksheet the student is able to download and re-upload when completed.

Step 1

Hover over “Assessments” and click on “Assignment” in the dropdown menu.
Step 2

Name the test or assignment. Give any instructions, and you can also upload a rubric or assignment information.

Step 3

Select a due date and time. Any submissions after that date and time will be marked as Late in Blackboard.
Step 4

Enter the number of points that are possible for the assignment. There are several other grading options that are available as well.

<table>
<thead>
<tr>
<th>GRADING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Points Possible</td>
</tr>
<tr>
<td>Associated Rubrics</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Name</th>
<th>Type</th>
</tr>
</thead>
</table>

Display of Grades
Step 5

The “Availability” section is where you can customize when the assignment becomes viewable to students. Mark “Make the Assignment Available” to make it available for students.

You can also set restrictions such as having it viewable between certain dates and times.

Step 6

Click the “Submit” button.
Note

As a reminder, you can check the student view by clicking on the Icon in the upper right corner of the course Home Page. You can navigate to the assignment to make sure it appears the way you want it to. In this example, you can see that the assignment is a paper that the student can upload for grading.
