

AGENDA
General Faculty Meeting
April 2, 2019

- I. Call to order**
- II. Approval of Minutes from the February 12, 2019 meeting**
- III. Report from the Executive Committee**
- IV. Elections**
- V. Proposal from the Admissions, Advising and Retention Committee (AARC) (*See the attachment for complete proposals*).**
 - Item A. Modify policy for eligibility to continue
 - Item B. Modify policy for adult students with no prior college coursework
- VI. Proposal from the Faculty Life Committee (*See the attachment for complete proposals*). [*For informational purposes only*]**
 - Item A. Modify policy for Student Evaluation of Faculty
 - Item B. Modify Appendix 9 in the Faculty Handbook
- VII. Report from the Faculty Senate (*See the attachment for complete proposals. See the appendix for supporting materials*).**
 - 1. Proposal from the Office of the Provost**
 - Item A. Modify policy for repeating courses
 - Item B. Modify policy for dropping courses
 - 2. Proposal from the Department of Biology**
 - Item A. Add BIO 107 and 108
 - Item B. Change description of BIO 105
 - Item C. Change description and prerequisite for BIO 106
 - Item D. Change description of major
 - Item E. Change description of Biology Secondary Education
 - Item F. Change pre-requisites for upper level Biology courses
 - Item G. Change pre-requisites for upper level Biology courses
 - Item H. Change pre-requisites for upper level Biology courses
 - Item I. Change pre-requisites for upper level Biology courses
 - Item J. Change four year plan for biology majors with chemistry minor
 - Item K. Change four year plan for biology majors: environmental science option with chemistry minor
 - Item L. Change four year plan for biology majors: medical technology option with chemistry minor
 - Item M. Change four year plan for biology majors: biology secondary education option
 - Item N. Change general biology requirements for pre-professional programs

- Item O. Change general biology requirements for cooperative programs
- Item P. Delete BIO 204
- Item Q. Delete BIO 314 and BIO 410
- Item R. Change biology course listings for Health Physics and Environmental Science options
- Item S. Add Pre-Physician Assistant curriculum
- Item T. Change program requirements

3. Proposal from the Department of English, Modern Languages, and Philosophy

- Item A. Change requirements for the Teacher Licensure Option
- Item B. Change language concluding the Teacher Licensure Option to reflect change in hours in “A”

4. Proposal from the Department of History

- Item A. Change education requirements for History Second Education option
- Item B. Change number of hours to reflect change made in “A”

5. Proposal from the Department of Sociology

- Item A. Modify course description of ANTH 200
- Item B. Add ANTH 220
- Item C. Add ANTH 230

6. Proposal from the Department of Mathematics

- Item A. Delete MATH 212
- Item B. Add MATH 213
- Item C. Change requirements for Mathematical Sciences option
- Item D. Change requirements for Teacher Licensure option
- Item E. Change requirements for Teacher Licensure option
- Item F. Change pre-requisites for MATH 305
- Item G. Change pre-requisites for MATH 425
- Item H. Change four year plan for Mathematics majors
- Item I. Change description of MATH 311
- Item J. Change requirement for professional education
- Item K. Change number of hours required for the Teacher Licensure option
- Item L. Change course description of MATH 131
- Item M. Change course description of MATH 134
- Item N. Change course description and number of MATH 110
- Item O. Change course description and number of MATH 110L
- Item P. Change pre-requisites for MATH 111
- Item Q. Change pre-requisites for MATH 121
- Item R. Change language regarding information about MATH 110
- Item S. Change language regarding information about MATH 110

7. Proposal from the School of Business

- Item A. Change language regarding a minor in Computer Science
- Item B. Change language regarding a collateral in Computer Science

- Item C. Add language to include a minor in Economics
- Item D. Add language to include a collateral in Economics
- Item E. Delete economics as a major

8. Proposal from the Department of Physics and Engineering

- Item A. Change language regarding the Computational Physics concentration
- Item B. Change language regarding the Health Physics concentration
- Item C. Change language regarding the Environmental Science concentration
- Item D. Change language regarding the pre-requisites for PHYS 320
- Item E. Change language regarding the pre-requisites for PHYS 406
- Item F. Change language regarding the Engineering Technology concentration
- Item G. Change language regarding the Engineering Technology concentration
- Item H. Change language regarding the pre-requisites for PSC 101
- Item I. Change language regarding the pre-requisites for PSC 150

9. Proposal from the Department of Chemistry

- Item A. Change language regarding the Environmental Science concentration

10. Proposal from the School of Education

- Item A. Change language regarding a co-requisite for ELEM 315
- Item B. Change language regarding a co-requisite for ELEM 316
- Item C. Change language regarding a co-requisite for ELEM 317
- Item D. Change language regarding a co-requisite for MLE 315
- Item E. Change language regarding a co-requisite for MLE 316
- Item F. Change language regarding a co-requisite for MLE 317
- Item G. Modify language describing MLE 315
- Item H. Modify language describing MLE 316
- Item I. Modify language describing MLE 317
- Item J. Change language regarding a prerequisite for EDUC 391
- Item K. Change language regarding a prerequisite for EDUC 392
- Item L. Change language regarding a prerequisite for EDUC 394
- Item M. Change language regarding a prerequisite for EDUC 421
- Item N. Change language regarding a prerequisite for EDUC 423
- Item O. Change language regarding a prerequisite for EDUC 425

11. Proposal from the School of Health Sciences, Nursing Department (pages 12 – 20)

- Item A. Add 608 Clinical Nursing Education
- Item B. Modify description of FMU MSN/Nurse Educator track
- Item C. Modify plan for correction
- Item D. Modify plan for new course

12. Proposal from the School of Health Sciences, Speech Language Pathology Program (SLP Program) (page 21)

- Item A. Modify 520 to spell out ASHA for clarity and Modify 530 course description
- Item B. Modify 550 hours and to spell out ASHA for clarity
- Item C. Modify 580 to spell out ASHA for clarity and clarify hours
- Item D. Modify 581 to spell out ASHA for clarity and clarify hours
- Item E. Modify 591 course description
- Item F. Modify 601 to spell out ASHA for clarity and clarify hours
- Item G. Modify 607 course description
- Item H. Modify 617 course description
- Item I. Modify 620 and 621 to spell out ASHA for clarity and clarify hours
- Item J. Modify 635 course description
- Item K. Add 645 a, b, c
- Item L. Modify program plan to clarify hours

13. Proposal from the School of Health Sciences, Nursing Department (page 29)

- Item A. Modify prerequisites/corequisites for 701
- Item B. Modify prerequisites/corequisites for 707

VIII. Approval of Candidates for Graduation

(Final approval is contingent upon final verification from the Registrar).

IX. Old Business

X. New Business

XI. Announcements

XII. Adjournment

Attachment to the General Faculty Meeting – April 2, 2019

V. Proposals from the Office of the Provost – Admissions, Advising and Retention Committee (AARC)

1. Proposal from the Office of the Provost

- A. **MODIFY** on pages 54-55 of current online catalog

FROM:

ACADEMIC STANDING

ELIGIBILITY TO CONTINUE

A minimum 2.0 cumulative grade point average is required to maintain good academic standing. After the first major (full fall or spring) semester a student fails to obtain the required minimum 2.0 overall grade point average, the student is placed on academic Probation 1 and will receive written notification from the University.

While on Probation 1, the student is strongly advised to repeat courses necessary to regain an overall 2.0 grade point average and may take no more than 13 credit hours in a major semester, seven hours in any one summer term, and four hours in the late spring term. The student is removed from probation if the cumulative grade point average is 2.0 or higher at the end of that semester. If the student's overall grade point average is less than a 1.25 at the end of the Probation 1 semester, then the student is dismissed.

If the student's overall grade point average is at least a 1.25 but less than a 2.0 at the end of the Probation 1 semester, then the student is placed on Probation 2. A student on Probation 2 is required to repeat courses to regain an overall 2.0 grade point average and is not allowed to take more than 13 hours in a major semester, seven hours in any one summer term, and four hours in the late spring term. Students on Probation 2 are assigned an academic advisor in the Center for Academic Success and Advisement. Once the student's academic advisor has advised the student, the academic advisor will enter the student's schedule into the system. The student is removed from probation if the cumulative grade point average is 2.0 or higher at the end of that semester. At the end of the Probation 2 semester, if the student fails to earn a 2.0 cumulative grade point average, the student is dismissed from the University.

If the grade point average of a student who has previously been on Probation 2 falls below a cumulative 2.0, the student will be placed on Probation 2. If the grade point average of a student with 87 or more hours falls below a cumulative 2.0 grade point average the student will be placed on Probation 2.

This policy is for eligibility to continue only. Some degree programs may have higher grade point average requirements for graduation.

TO:

ACADEMIC STANDING

ELIGIBILITY TO CONTINUE

A minimum 2.0 cumulative grade point average is required to maintain good academic standing.

PROBATION

After the first major (full fall or spring) semester a student fails to obtain the required minimum 2.0 overall grade point average, the student is placed on academic Probation 1 and will receive written notification from the University.

While on Probation 1, the student is strongly advised encouraged to repeat appropriate courses necessary to regain an overall 2.0 grade point average and

may take no more than 13 14 credit hours in a major semester, seven hours in any one summer term, and four hours in the late spring term. The student is removed from probation if the cumulative grade point average is 2.0 or higher at the end of that semester. At the end of the Probation 1 semester, if the student's semester GPA is at or above a 2.0 but the cumulative GPA is below 2.0, that student will stay on Probation 1 during the following semester. At the end of the Probation 1 semester, if the student's overall grade point average is less than a 1.25 at the end of the Probation 1 semester and the semester GPA is below a 2.0, then the student is dismissed.

If the student's semester GPA is below 2.0 and the overall cumulative grade point average is at least a 1.25 but less than a 2.0 at the end of the Probation 1 semester, then the student is placed on Probation 2. A student on Probation 2 is strongly encouraged required to repeat appropriate courses to regain an overall 2.0 grade point average and is not allowed to take more than 13 14 hours in a major semester, seven hours in any one summer term, and four hours in the late spring term. Students on Probation 2 are assigned an academic advisor in the Center for Academic Success and Advisement. Once the student's academic advisor has advised the student, the academic advisor will enter the student's schedule into the system. The student is required to meet with their CASA advisor at least twice during the Probation 2 semester. The student is removed from probation if the cumulative grade point average is 2.0 or higher at the end of that semester. At the end of the Probation 2 semester, if the student earns a semester GPA of 2.0 or above but earns a cumulative GPA below 2.0, that student is placed on Probation 1 for the following semester. At the end of the Probation 2 semester, if the student fails to earn a 2.0 cumulative grade point average and the semester GPA is also below a 2.0, the student is dismissed from the University.

~~If the grade point average of a student who has previously been on Probation 2 falls below a cumulative 2.0, the student will be placed on Probation 2. If the grade point average of a student with 87 or more hours falls below a cumulative 2.0 grade point average the student will be placed on Probation 2.~~

This policy is for eligibility to continue only. Some degree programs may have higher grade point average requirements for graduation.

RATIONALE:

This update to the university's probation policy redefines the standards for Probation 1 and Probation 2. The revised policy upholds the university's academic standards while allowing students who make academic progress more time to achieve a 2.0 cumulative GPA.

According to the current policy, FMU students on Probation 2 are dismissed if their cumulative GPA is below 2.0. For students who begin at FMU, have a challenging first semester, and discover during their first year that their major choice is not a good match, it can be very difficult for them to achieve a cumulative 2.0 GPA by the end of the third semester. FMU's current probation policy also stipulates that students on Probation 2 must retake D and F grades. For

students who discover that their initial major is not the right fit, it is unproductive to require them to retake classes that are no longer relevant to their plan of study.

The revisions to this policy allow students to continue at the university as long as their semester GPA is above a 2.0. This policy contains mandated interventions at the Probation 2 level and discontinues students who are genuinely not making progress at the university.

This policy also updates the number of credit hours a student on probation can take per semester, from 13 to 14. A limit of fourteen credit hours will better accommodate students retaking lab classes.

B. **MODIFY** on page 21 of current online catalog / Undergraduate Admissions

FROM:

ADULT STUDENT WITH NO PRIOR COLLEGE COURSEWORK (DEGREE SEEKING)

Students who are at least 25 years old and who have not attempted any prior college coursework, regardless of the length of time they have been out of school, are eligible for consideration under the Adult Student Admission Policy.

Veterans under 25 years old who have served on active duty a minimum of three years are also eligible for consideration under the Adult Student Admission Policy.

Students applying to FMU under this policy must have a high school diploma or equivalent. If an adult student has prior college coursework, then the transfer student admission requirements must be met. See “Transfer Student” in this section.

Adult students with no prior college coursework must submit the following:

1. Completed application
2. Proof of high school diploma or its equivalent
3. Official transcripts from high school(s) attended
4. Pay the nonrefundable application fee

Prior to enrollment, students admitted as adult students will take placement tests in English and mathematics for accurate placement in these areas. Adult students may receive academic credit for life experience by CLEP or foreign language examinations.

TO:

ADULT STUDENT WITH NO PRIOR COLLEGE COURSEWORK (DEGREE SEEKING)

Students who are at least 21 years old and who have not attempted any prior college coursework, regardless of the length of time they have been out of high school, are eligible for consideration under the Adult Student Admission Policy.

Veterans under 21 years old who have served on active duty at least one year are also eligible for consideration under the Adult Student Admission Policy.

Students applying to FMU under this policy must have a high school diploma or equivalent. If an adult student has prior college coursework, then the transfer student admission requirements must be met. See “Transfer Student” in this section.

Adult students with no prior college coursework must submit the following:

1. Completed application
2. Proof of high school diploma or its equivalent
3. Official transcripts from high school(s) attended
4. Pay the nonrefundable application fee

Prior to enrollment, students admitted as adult students will take placement tests in English and mathematics for accurate placement in these areas. Adult students may receive academic credit for life experience by CLEP or foreign language examinations

RATIONALE:

The Office of Admissions seeks to lower the age requirement of the student defined as “Adult with No Prior College Coursework” from age 25 to age 21. The age requirement of 21 or older aligns with current national higher education best practices, as well as agrees with South Carolina and neighboring North Carolina peer institutions. Lowering the age requirement expands the FMU recruitment market for this population, and is less restrictive for the prospective student. The age adjustment would also aid in best serving the students of the Pee Dee region, by creating further educational opportunities for students who choose higher education at a later point in life for various socio-economic and preparedness reasons.

In addition, lowering the age requirement for veterans, as well as years of service to one year in this category would create a more FMU military friendly environment. The five-year comprehensive enrollment plan for the University outlines goals to best engage veterans. This change would align well with the overall plan to meet those goals, and provide service members with a benefit that is distinguishing from the general population.

VI. Proposal from the Faculty Life Committee (for informational purposes only)

A. **MODIFY** on pages 11-13 of the Faculty Handbook under Student Evaluations of Faculty

FROM:

II. Student Evaluations of Faculty

A. General Guidelines for Use of Student Rating Forms

1. Faculty are required to administer student course evaluations during spring and fall sessions. During all summer sessions, student course evaluations are normally administered only at the faculty member's request; however, faculty are required to administer student course evaluations during the summer if no one has taught the course during the current academic year. Results of voluntary summer student course evaluations are sent only to the faculty member; department chairs/deans do not receive copies of voluntary evaluations unless the faculty member chooses to forward a copy to the chair/dean.
2. Summative evaluations, using The FMU Student Rating Form (See Appendix 8), shall normally be based on one year's data. Faculty shall not be evaluated solely on the basis of one student or one class. Except in the case of first-year appointments, faculty shall not be evaluated based on data from one semester.
3. Student Rating Forms shall always be used in combination with other sources of information concerning teaching, such as, annual evaluations by deans/chairs, annual self-evaluations, evaluation by colleagues, and/or portfolio information.
4. Faculty shall never be rank-ordered on the basis of Student Rating Forms or any other single piece of data. Differences among class averages of student ratings, even based on several semesters, cannot be assumed to measure accurately differences in teaching effectiveness. No single instrument to measure teaching effectiveness is so reliable and valid as to allow ranking of teaching effectiveness, as small numerical differences cannot be assumed accurately to distinguish significant differences in teaching effectiveness.
5. Student ratings shall always be viewed within the context of an individual's teaching assignment. The factors to be considered might include class size, introductory course versus upper-level, rating of instructors of similar courses within the discipline, teaching load, experience in teaching a course, etc.
6. Faculty shall always have the right to provide clarification of student evaluations.
7. Faculty should take the steps necessary to understand clearly how student ratings will be used in faculty evaluations.
8. No one item on a student evaluation shall be used to draw conclusions. Even the most effective instructor, due to style or experience, may not score high on any one particular item.
9. A uniform system of administering and collecting the information will be used.

B. Administration Procedures

1. Each faculty member chooses a day within the last two weeks of class for administering the Student Rating Form.
2. The faculty member asks for a student volunteer, informs the volunteer of his or her duties, asks the volunteer if there are any questions, and leaves the room.
3. The student volunteer hands out Student Rating Forms, comment cards, and pencils.
4. The student volunteer makes the three announcements outlined in the document.
5. The student volunteer collects material, places material in a prepared envelope, seals the

envelope, and returns the envelope to a specified administrative assistant. Night classes use the Library and the Library book drop. Instructors of off-campus classes are provided a pre-addressed mailing envelope so that an administrative assistant at the satellite location mails results to the Francis Marion University campus designee.

6. The administrative assistant forwards the answer sheets to the Academic Computer Center for data analysis.
7. The administrative assistant forwards the comment cards to the individual faculty member after the deadline for faculty to submit grades to the Registrar's Office.
8. Course evaluations for online courses may be delivered in an online format if anonymity is protected.

C. Data Analysis Procedure

Results of voluntary summer evaluations are sent only to the faculty member. The results of mandatory student course evaluations are provided to each faculty member and his or her chair/dean with the following summary data for each question on the Student Rating Form:

1. Mean, median, standard deviation, and skewness of ratings for each course taught by that instructor.
2. Mean, median, standard deviation, and skewness of ratings for School and department across all courses.
3. Mean, median, standard deviation, and skewness of ratings for other sections of the same course.
4. Mean, median, standard deviation, and skewness of ratings for other lower-division courses (100-/200- level) for that School and department; or mean, median, standard deviation, and skewness of ratings for other upper-division courses (300-/400- level) for that School and department; or mean, median, standard deviation, and skewness of ratings for graduate courses for that School and department
5. Mean, median, standard deviation, and skewness of ratings for all courses across the Schools and the University.
6. Other analyses as requested by the individual faculty member (i.e., analysis to determine the effects of GPA on ratings).

7. A frequency distribution for each question for each class (for faculty members only).

In certain situations the above analyses will not be applicable. Faculty members or academic units may add questions to the Student Rating Form.

D. Procedures for Utilization of Student Rating Form Data

1. Annual summary data will become part of the faculty member's annual report and be used as one indicator of teaching effectiveness in the chair/dean's annual evaluation of the faculty member.
2. The Student Rating Form data must be evaluated within the context of other information gathered.

E. Monitoring/Review

The Student Rating Form will be reviewed for reliability and validity as needed.

7. Faculty should take the steps necessary to understand clearly how student ratings will be used in faculty evaluations.
8. No one item on a student evaluation shall be used to draw conclusions. Even the most effective instructor, due to style or experience, may not score high on any one particular item.
9. A uniform system of administering and collecting the information will be used.

B. Administration Procedures

1. Course evaluations will be conducted via the Blackboard online learning management system, except as described in 2.
2. A paper version of the Student Rating Form may be used, upon request, for tenure-track faculty, up to the first five semesters of full-time employment (i.e., prior to the Third-Year Peer Review).
3. Access to the Student Rating Form will be granted only via unique URL to be sent to enrolled students in each course.
4. The Blackboard Administrator will release the emailed link to the online Student Rating Form (see Appendix 9) at 10 days prior to Reading Day, with follow-up reminders sent 5 days and 1 day prior to Reading Day to those students who have not yet completed the form.
5. Classroom time may be used to encourage student completion and participation of the Rating Form.
6. Student comments and rating data will be reported to the individual faculty member by Campus Technology staff, after the close of grades.

C. Data Analysis Procedure

Results of voluntary summer evaluations are sent only to the faculty member. The results of mandatory student course evaluations are provided to each faculty member and his or her chair/dean with the following summary data for each question on the Student Rating Form:

1. Mean, median, standard deviation, and skewness of ratings for each course taught by that instructor.
2. Mean, median, standard deviation, and skewness of ratings for School and department across all courses.
3. Mean, median, standard deviation, and skewness of ratings for other sections of the same course.
4. Mean, median, standard deviation, and skewness of ratings for other lower-division courses (100-/200- level) for that School and department; or mean, median, standard deviation, and skewness of ratings for other upper-division courses (300-/400- level) for that School and department; or mean, median,

- standard deviation, and skewness of ratings for graduate courses for that School and department
5. Mean, median, standard deviation, and skewness of ratings for all courses across the Schools and the University.
 6. Other analyses as requested by the individual faculty member (i.e., analysis to determine the effects of GPA on ratings).
 7. A frequency distribution for each question for each class (for faculty members only).

In certain situations the above analyses will not be applicable. Faculty members or academic units may add questions to the Student Rating Form.

D. Procedures for Utilization of Student Rating Form Data

1. Annual summary data will become part of the faculty member's annual report and be used as one indicator of teaching effectiveness in the chair/dean's annual evaluation of the faculty member.
2. The Student Rating Form data must be evaluated within the context of other information gathered.

E. Monitoring/Review

The Student Rating Form will be reviewed for reliability and validity as needed.

B. MODIFY Appendix 9 in the Faculty Handbook

FROM:

[Current Appendix 9, see p. 134 of current Faculty Handbook]

TO:

Francis Marion University Student Rating Form

Your opinions are important in helping the University maintain and improve the quality of its courses. Please answer each item honestly and thoughtfully. Remember, this evaluation process is strictly confidential. Your instructor will not receive the results of the survey until after final grades have been submitted.

1. Instructor Ratings

- The instructor was prepared and organized.
- The instructor presented material in a clear and understandable manner.
- The instructor was able to stimulate my thinking about the subject matter.
- The instructor was able to improve my understanding of the subject matter.
- The instructor maintained a positive learning environment.
- The instructor adequately explained course assignments and requirements.

- The instructor was available to me outside of the classroom.
- The instructor returned graded work within a reasonable time period.
- The instructor evaluated graded work fairly.
- I would recommend this instructor to other students.

Strongly Disagree | Disagree | Neither Agree nor Disagree | Agree | Strongly Agree

1 2 3 4 5

2. Course Ratings

- Please rate the overall quality of this course.
- Please rate the relevance of assignments to the course description.
- Please rate the textbook and other required materials used in this course.

Poor	Fair	Average	Good	Excellent
1	2	3	4	5

3. Self Rating

- The grade that I expect in this course is:

A B+ B C+ C D+ D F Other/NA

4. Please type additional comments in the box below. These comments will only be shared with the instructor.

RATIONALE

- The University spends a considerable amount of human and material resources to maintain its current paper-based review system, while also offering an online review system for a number of its web-based courses.
- This revision brings the current system to a uniform standard that is entirely conducted online, while also preserving the fundamentals of the current system.
- Because student participation may be lower for online evaluations in some cases, the system allows for tenure-track faculty who have not yet undergone a third-year peer review to request the use of paper-based rating forms, during their first five semesters of employment.
- The Student Rating form was last edited in 2004. The move online provides us with the opportunity to update questions to match best practices, both in social science survey design and among other universities.

VII. Report from the Faculty Senate

1. Proposal from the Office of the Provost

A. MODIFY on page 54 of current online catalog

FROM:

REPEATING COURSES

A student may repeat courses to improve his/her grade point average. The grade earned after the first enrollment of a course will replace the grade originally earned when calculating the student's grade point average, provided that the repeat grade is higher than the original grade. All grades earned after the first repetition of a course will be included in the calculation of grade point average. (It is recommended that courses for which a grade of D or F was earned be repeated.) A student may not repeat for credit a 100- or 200-level language course once he/she has received credit for another course at a higher level in the same language and may not repeat for credit the lower-level course of any subject in a hyphenated sequence once he/she has received credit for the higher-level course. Once a student has completed, either successfully or unsuccessfully, a course at FMU, he/she may not repeat that course at another institution for transfer credit to FMU. However, a student may be permitted to repeat for additional credit a course he/she took for credit ten or more years previously.

A student may not repeat a nursing course that has a clinical or laboratory component unless they are enrolled in the nursing program.

A student may not repeat an Honors course in order to raise his/her grade point average. In order to improve the grade point average, a student may repeat in a regular section a course that he/she took as an Honors section, but the new grade will carry no Honors credit.

When a student repeats a course, all grades appear on the transcript. Grades of CO and W are not used in the calculation of grade point average. These grades also are not counted in the repeat regulations.

TO:

REPEATING COURSES

Students may enroll in a course for a maximum of three times. Enrollments resulting in a grade of W are included in this total.

The grade earned during the second enrollment in a course will replace the original grade when calculating the student's grade point average, as long as the grade earned during the second enrollment is higher than the original grade. All

grades earned after the second enrollment in a course will be included in the calculation of grade point average. ~~A student may repeat courses to improve his/her grade point average. The grade earned after the first enrollment of a course will replace the grade originally earned when calculating the student's grade point average, provided that the repeat grade is higher than the original grade. All grades earned after the first repetition of a course will be included in the calculation of grade point average. (It is recommended that courses for which a grade of D or F was earned be repeated.)~~

A student may not repeat for credit a 100- or 200-level language course for a higher grade once he/she has received credit for another course at a higher level in the same language, and A student also may not repeat for credit the lower-level course of any subject in a hyphenated sequence (e.g. Chemistry 201 or Chemistry 301) for a higher grade once he/she has received credit for the higher-level course (e.g. Chemistry 202 or 302).

Once a student has completed, either successfully or unsuccessfully, a course at FMU, he/she may not repeat that course at another institution for transfer credit to FMU. However, a student may be permitted to repeat for additional credit a course he/she took for credit ten or more years previously.

A student may not repeat a nursing course that has a clinical or laboratory component unless they are enrolled in the nursing program.

A student may not repeat an Honors course in order to raise his/her grade point average. In order to improve the grade point average, a student may repeat in a regular section a course that he/she took as an Honors section, but the new grade will carry no Honors credit.

When a student repeats a course, all grades appear on the transcript. Grades of CO and W are not used in the calculation of grade point average but may affect a student's eligibility for financial assistance. Students should consult with Financial Assistance and their advisors before making a decision to repeat a course. ~~These grades also are not counted in the repeat regulations.~~

Appeals to this policy must be made to the Provost in writing before registration in the class.

RATIONALE:

The repeat policy is being amended to limit the number of times a student can take a course without appeal. This change will prevent students from repeatedly enrolling and withdrawing from the same course, which has resulted in enrollment backups in prerequisite courses for some majors. The appeal process will also allow the Office of the Provost and advisors an opportunity to intervene and

provide students will guidance on their degree program and study habits before they are permitted to take a course more than three times.

Language regarding the grade replacement policy has also been revised for clarity.

B. **MODIFY** on page 49 of current online catalog

FROM:

DROPPING COURSES

A student is expected to follow the course schedule for which he/she registers. However, prior to the completion of 33 percent of a course, a student may initiate withdrawal from a course and the grade recorded will be W. After the completion of 33 percent of a course and prior to completion of 85 percent of a course, a student may still initiate withdrawal from a course but the grade recorded will be F or W based on the academic average at the time of withdrawal. During the last 15 percent of a course, a student may not initiate withdrawal from a course. When a student initiates withdrawal from a course, the withdrawal is not complete until the student fills out a Drop Form, obtains all required signatures in the proper order, and delivers the form to the Registrar's Office.

A faculty member may withdraw a student from his/her course for a violation of the stated attendance policy at any time during a semester. Prior to the completion of 33 percent of a course, a faculty member may withdraw a student from a course for a violation of the stated attendance policy and the grade recorded will be W. After the completion of 33 percent of a course, a faculty member may still withdraw a student from a course for a violation of the stated attendance policy but the grade recorded will be F or W based on the academic average at the time of withdrawal. When a faculty member withdraws a student from a course, the withdrawal is not complete until the faculty member fills out an Automatic Dropping of Students Form, obtains the signature of the department chair or dean, and delivers the form to the Registrar's Office.

TO:

DROPPING COURSES

A student is expected to follow the course schedule for which he/she registers. However, prior to the completion of 33 50 percent of a course, a student may initiate withdrawal from a course and the grade recorded will be W. After the completion of 33 50 percent of a course and prior to completion of 85 percent of a course, a student may still initiate withdrawal from a course but the grade recorded will be an F or W based on the academic average at the time of withdrawal. During the last 15 percent of a course, a student may not initiate

withdrawal from a course. When a student initiates withdrawal from a course, the withdrawal is not complete until the student fills out a Drop Form, obtains all required signatures in the proper order, and delivers the form to the Registrar's Office.

A faculty member may withdraw a student from his/her course for a violation of the stated attendance policy at any time during a semester. Prior to the completion of 33% of a course, a faculty member may withdraw a student from a course for a violation of the stated attendance policy and the grade recorded will be W. After the completion of 50% of a course, a faculty member may still withdraw a student from a course for a violation of the stated attendance policy but the grade recorded will be F or W based on the academic average at the time of withdrawal. When a faculty member withdraws a student from a course, the withdrawal is not complete until the faculty member fills out an Automatic Dropping of Students Form, obtains the signature of the department chair or dean, and delivers the form to the Registrar's Office.

RATIONALE:

With this proposal, the course withdrawal date with an automatic grade of W would shift from 33% of course completion to 50% of course completion. FMU's automatic W dates are much earlier than those of other comprehensive institutions in the state:

School	Automatic W Date
Francis Marion	33% of semester (In 2018-2019, September 17 / February 11.)
Lander	8 weeks
USC Aiken	October 31 / March 31 (similar start date to FMU)
Coastal Carolina	2/3 of semester
College of Charleston	October 25 / March 25 (similar start date to FMU)

The increase to 50% gives students more time in a course and the opportunity to take multiple assessments before making the decision to withdraw. First-year students also need more time than 33% of course completion to adjust to college and academic requirements before making decisions about withdrawals.

2. Proposal from the Department of Biology

A. ADD on page 71 of the current catalog

107 Integrated Biological Concepts I (4:3-3)
Introduction to biology's core concepts from molecules through cells

including biological information, evolution, cells, emergent properties and homeostasis. This course covers similar material found in Biology 105 but increases the amount of critical analysis of data and teaches the skills necessary to critically think about biological problems. This course is designed for Biology Majors, Minors, and other science majors. Credit cannot be given for both Biology 105 and 107.

108 Integrated Biological Concepts II (4:3-3)

Introduction to biology's core concepts from organisms through ecological systems, including biological information, evolution, cells, emergent properties, and homeostasis. This course covers similar material found in Biology 106 but increases the amount of critical analysis of data and teaches the skills necessary to critically think about biological problems. This course is designed for Biology Majors, Minors, and other science majors. Credit cannot be given for both Biology 106 and 108

B. CHANGE on page 71 of the current catalog

FROM

105 Biological Sciences I (4:3-3) F, S, Su The content of this course cover.....Recommended for other science majors and middle level education majors who have an emphasis in science.

TO

105 Biological Sciences I (4:3-3) F, S, Su The content of this course covers.....Recommended for other science majors and middle level education majors who have an emphasis in science. **Credit cannot be given for both Biology 105 and 107.**

C. CHANGE on page 71 of the current catalog

FROM

106 Biological Sciences II (4:3-3) **(Prerequisite: 103 and 104, or 105 and 115, or permission of the department) F, S, Su.**

TO

106 Biological Sciences II (4:3-3) **F, S, Su. Credit cannot be given for both Biology 106 and 108**

RATIONALE: The addition of courses listed above have come from an examination of the Biology Department's Curriculum in an effort to align with the recommendations in the National Science Foundation's Vision and Change Document. These courses, while they cover the same material found in Biology 105 and 106, decreases the amount of content covered and increases the critical analysis of data and teaches the skills necessary to critically think about biological problems. In addition, the new courses can accommodate differences in learning styles for students. The changes in prerequisites for biology 106 adds flexibility

for student schedules and reduce the burden on scheduling for the department.

**D. CHANGE on page 69 of the current catalog
FROM**

MAJOR

A Major in biology requires the following

1. Biology 105* and 115*, 106, and 499
2. One course in plant biology (either 206, 207, 208, 303, 307, 313 or 320)
3. Biology 301, 302, or 407
4. One course in Ecology (either 308, 314, 317, 411, or 412)
5. Biology 401 or 409
6. Additional courses in biology to bring the total to 25 semester hours above the 100 level.....
7. Minor/collateral requirements two options.....

TO

MAJOR

A Major in biology requires the following

1. Biology 105* and 115* or 107
2. Biology 106 or 108
3. One course in organismal biology (either 201, 202, 206, 207, 208, 209, 303, 307, 311, 312, 313, 315, or 320)
4. Biology 499
5. Biology 301, 302, or 407
6. One course in Ecology (either 308, 317, 411, or 412)
7. Biology 401 or 409
8. Additional courses in biology to bring the total to 25 semester hours above the 100 level.....
9. Minor/collateral requirements **two options**.....

RATIONALE: Changes the wording regarding the requirements of the Biology Major to reflect the addition of the new courses and a change in one of the required areas of the major – Plant is changed to Organismal – this change will provide students with greater flexibility in completing the major during their time at FMU.

S. ADD on page 174, new PRE-PROFESSIONAL PROGRAM: PRE-PHYSICIAN ASSISTANT CURRICULUM

PRE-PHYSICIAN ASSISTANT CURRICULUM

Coordinator: Dr. Vernon Bauer

Each student should acquaint himself/herself with the specific requirements of the Physician Assistant Programs to which he/she plans to apply for admission. Each student planning a career as a physician assistant should register with the Pre-Physician Assistant Coordinator (Department of Biology, Leatherman Science Facility). Pre-Physician Assistant students typically major in biology or chemistry; however, a specific major is not required. As long as the prerequisite courses are met, a bachelor's degree in any area is acceptable.

The following courses, as part of, or along with a bachelor's degree, meet the minimal recommendations of most Physician Assistant Schools in South Carolina:

General Biology (BIOL 105 and 115 or 107)	4 hours
Human Anatomy (BIOL 205)	4 hours
Human Physiology (BIOL 406)	4 hours
Microbiology (BIOL 311)	4 hours
Genetics (BIOL 401)	4 hours
General Chemistry (CHEM 101, 102)	8 hours
Organic Chemistry/Biochemistry (CHEM 201, 404)..	7 hours
Medical Terminology (NURS 211).....	1 hour
Psychology (PSY 206, 325, or 334)	6 hours
Statistics (MATH 134)	3 hours

In order to apply to most programs in Physician Assistant Studies, students must take the Graduate Record Exam (GRE) and complete the Central Application Service for Physician Assistants (CASPA) process. The earliest this can be done is during the year prior to graduation from FMU, though there is no penalty for waiting until after graduation. Physician Assistant Programs have indicated that students generally need to score in the 60th percentile and have a GPA above 3.6 if they want to be competitive during the application process. Many programs also require significant practical experiences under the supervision of a practicing physician assistant or medical doctor to provide clinical exposure to the profession.

Rationale for S: In order for us to be able to identify students in the Colleague system as pre-PA students, we need to have some type of program description in the catalog for SACS purposes. This description provides general information that will help students and advisors know how to prepare for PA schools at FMU, MUSC, and USC.

Education 487	3
Education 490	12

**Education 487 and 490 to be taken simultaneously

RATIONALE:

South Carolina Read to Succeed Act Governor's Action: June 11, 2014, Signed Section 59-155-180. Beginning with students entering a teacher education program in the fall semester of the 2016-2017 School Year, all pre-service teacher education programs must require all candidates seeking certification at the middle or secondary level to complete a six credit hour sequence in literacy that includes a course in the foundations of literacy and a course in content area reading. Also, the SOE has changed the courses and course hours for the student teaching block.

The six-credit-hour sequence in literacy is accomplished by the addition of Education 322 (3 hrs) (Education 411 is already required and will also fulfill the requirement). In order for this addition not to increase the required hours for the major, Health 301 (3 hrs) was removed from the major. These changes involving Health 301 were approved by the Faculty.

Changes to the formatting of Education 393 and Education 434 were made to improve the consistency and clarity of the list.

EDUC 420 is replacing EDUC 380, pending approval by the Academic Affairs Committee and the FMU faculty.

B. **CHANGE**, the concluding of the Teacher Licensure Option section on page 82 of the current catalog

FROM:

The minimum number of semester hours in all courses (major and non-major) required for the liberal arts major and the professional writing option in English is 120; for the professional education major in English, it is 126.

TO:

The minimum number of semester hours in all courses (major and non-major) required for the liberal arts major and the professional writing option in English is 120; for the teacher licensure option in English, it is 127.

RATIONALE:

The change to the number of hours is necessitated by course changes. The change to the title of the teacher licensure option provides consistency with the rest of the catalog.

4. Proposal from the Department of History

A. **CHANGE**, on page 104 of the current catalog, under **Education Requirements**

FROM

Education 380.....2

TO

Education 420.....3

Rationale:

According to the School of Education in a proposal accepted at the Academic Affairs Committee meeting on January 24, 2019, “The School of Education has replaced EDUC 380 Introduction to Exception Students with EDUC 420 Introduction to the Exceptional Learner. This change will align the BGS Educational Studies requirements with the School of Education requirements.” Furthermore, EDUC 420 is a three-hour course, whereas EDUC 380 was two hours.

B. **CHANGE**, on page 104 of the current catalog, under **Education Requirements**

FROM

Total hours required for graduation.....123

TO

Total hours required for graduation.....124

Rationale:

The decision to replace the two-hour EDUC 380 course with the three-hour EDUC 420 increases by one the total number of hours a student seeking certification to teach Social Studies at the secondary level.

5. Proposal from the Department of Sociology

A. **MODIFY** ANTH 200 on page 133 of the FMU 2018-2019 catalog

FROM:

200 Introduction to Anthropology (3) The science of man; a general analysis of biological and cultural systems with an emphasis on social organization and behavior.

TO:

200 Introduction to Anthropology (3) An introduction to the anthropological way of thinking about language, human and animal interactions, culture, prehistory, the rise of civilization, evolution, and fossil hominins, among other areas. This course will touch on the four sub-fields of anthropology: archaeology and biological, cultural, and linguistic anthropology.

RATIONALE FOR CHANGE:

The description for this course has not been updated in over 20 years, to reflect the current issues in the field of Anthropology. The proposed expanded course description will also give potential students a better idea of what topics the course covers.

B. **ADD** to page 133, the Anthropology section, of the FMU 2018-2019 catalog:

220 Native Peoples of North America (3) (Prerequisite: ANTH 200 or permission of the department) An introduction to the history, culture, and contemporary lives of Native American and First Nations peoples in North America. This course explores decolonization through Indigenous film, music, art, and literature while studying contemporary issues facing Native American and First Nations peoples and their communities.

Rationale for Addition:

We are expanding the course offerings in Anthropology and it makes practical sense to include a course on the indigenous peoples of this continent. It also draws upon the research expertise of the new Anthropology faculty hire, Dr. Kiley Molinari.

C. **ADD** to page 133, the Anthropology section, of the FMU 2018-2019 catalog:

230 Cultural Anthropology (3) (Prerequisite: ANTH 200 or permission of the department) An introduction to the diversity of human behavior, organization, and worldviews, including religious practices, social organization, gender and kinship systems, art, and globalization. Students will learn and apply the theories and

methods of anthropology to the identification of similarities and differences in humans across a variety of cultural groups. This course includes an ethnographic field research component.

RATIONALE FOR ADDITION:

We are expanding the course offerings in Anthropology to include a course that focuses on one of the primary sub-fields of Anthropology, Cultural Anthropology. It also draws upon the research expertise of the new Anthropology faculty hire, Dr. Kiley Molinari.

6. Proposal from the Department of Mathematics -

A. **DELETE** on page 112 of the 2018-2019 catalog

212 Introduction to FORTRAN (3) (Prerequisite/Corequisite Mathematics 201 or permission of department) (Same as Computer Science 212) F, S, SU. A study of programming to include input and output procedures, arithmetic and logical operations, DO loops, branching procedures, arrays, declaration statements, and subroutines. Application of these ideas by writing, running, and correcting programs.

B. **ADD** on page 112 of the 2018-19 catalog

213 Scientific Programming in Python (3) (Prerequisite/Corequisite Mathematics 201 or permission of department) F, S, SU. Introduction to Python fundamentals including built-in data types, functions (definition and use), decision and repetition structures, and file processing. Applications of Python in scientific fields.

RATIONALE for A and B

Since FORTRAN is one of the oldest scientific programming languages and it has fallen out of favor in the scientific community in recent years, it is time to update the course with a more popular and widely used scientific programming language.

There are many programming languages such as C, C++, MatLab and Python that are currently widely used in the scientific fields. However, Python is much easier to learn and easier to debug in contrast to languages like C and C++. Moreover, it is also an open source programming language with many freely available no-cost IDEs (Integrated Development Environments). MatLab, on the other hand, requires the purchase of a license to use as well as extra toolkits for special programming functionality.

Indeed, Python has become extremely popular in scientific computing, Data Science and Machine learning due to the development of many specialized libraries such as *NumPy*, *Scipy*, *Scikit_Learn*, etc. These libraries are well documented and supported by a large community of users. Many major companies such as Google, Yahoo, and NASA make extensive use of Python for data analysis and machine learning applications.

A and B change the name, number, and description of the course. C-G align related references in the catalog dealing with the math major requirements and prerequisites. Because both the course title and course description have been changed, a new course number is necessary. This is the reason for the change from Mathematics 212 to Mathematics 213. Computer Science 212 has been deleted, so all references to Computer Science 212/CS 212/Math 212 have been changed to align with the new Mathematics 213.

C. **CHANGE** on page 110 of the current catalog in the Mathematical Sciences Option

Computer Science 190, 212, or 226 –

TO:

Mathematics 213 or Computer Science 190 or 226 –

F. **CHANGE** the prerequisites of Math 305 Linear Programming, on page 113 of the 2018-19 catalog

FROM:

305 Linear Programming (3) (Prerequisites: 304 and one course from **212** or Computer Science 226) S.

TO:

305 Linear Programming (3) (Prerequisites: 304 and one course from **213** or Computer Science 226) S.

G. **CHANGE** the prerequisites of Math 425 Numerical Analysis, on page 114 of the 2018-19 catalog

FROM:

425 Numerical Analysis (3) (Prerequisite: 203 and one of **212** or Computer Science 226) (Same as Computer Science 425) F.

TO:

425 Numerical Analysis (3) (Prerequisites: 203 and one of **213** or Computer Science 226) (Same as Computer Science 425) F.

H. **CHANGE** on page 115 of the current catalog in the spring semester of the Sophomore Year of the Four Year Plan for Mathematics Majors

FROM:

Computer Science **212** or 226 3

TO:

Mathematics 213 or Computer Science 226 3

I. **CHANGE** on page 110 of the current catalog in the Mathematical Sciences Option

FROM:

b) Mathematics 311 (Double majors may substitute Mathematics 230 for Mathematics **311** but not if they plan to take Mathematics 407)

c) Mathematics 405 or 407 or **420**

TO:

b) Mathematics 311 (Double majors may substitute Mathematics 230 for Mathematics **311**)

c) Mathematics 405 or 407 or 411

RATIONALE:

Topology is just as relevant as abstract algebra and real analysis (especially for graduate school), and more centered on proofs than probability. Allowing students to use Math 411 to satisfy this requirement increases the likelihood students will take the course. Double majors may take Math 230 and the department believes it is not necessary for them to also take Math 311 before Math 407.

J. **CHANGE** on page 110 of the current catalog

FROM:

Professional Education	14 hours	14 hours
Education 310 or Computer Science 190 or higher	3	3
Education 311	3	3
Education 313	1	1
Education 380	2	2
Education 393 and 436 taken concurrently	5	5

Education 311	3	3
Education 313	1	1
Education 420	3	3
Education 393 and 436 taken concurrently	5	5

RATIONALE:

EDUC 380 has been replaced by the School of Education with the EDUC 420 course in order to streamline courses. The coursework for EDUC 420 is similar to EDUC 380 and allows students to take the course without the pre-requisite of acceptance into the Education program. The change also provides an additional credit hour for the course (from 2 credits for EDUC 380 to 3 credits for EDUC 420) thereby increasing the number of credit hours in Professional Education Courses from 14 to 15.

K. **CHANGE** on page 111 of the current catalog

FROM:

The minimum number of semester hours required in major courses for a major in mathematics is 33 for the Mathematical Sciences Option and 36 for the Teacher Licensure Option. The minimum number of semester hours in all courses (major and non-major) required for the major in mathematics is 120 (121 for Teacher Licensure Option if the collateral is chosen in a biological or physical science.)

TO:

The minimum number of semester hours required in major courses for a major in mathematics is 33 for the Mathematical Sciences Option and 36 for the Teacher Licensure Option. The minimum number of semester hours in all courses (major and non-major) required for the major in mathematics is 120 (122 for Teacher Licensure Option if the collateral is chosen in a biological or physical science.)

RATIONALE:

EDUC 380 has been replaced by the School of Education with the EDUC 420 course in order to streamline courses. The coursework for EDUC 420 is similar to EDUC 380 and allows students to take the course without the pre-requisite of acceptance into the Education program. The change also provides an additional credit hour for the course (from 2 credits for EDUC 380 to 3 credits for EDUC 420) thereby increasing the minimum number of semester hours required for the Teaching Licensure Option from 121 to 122.

L. **CHANGE** on page 112 of the current catalog

FROM:

131 Mathematical Modeling and Problem Solving (3) (Prerequisite: Grade of C or higher in Mathematics 111 or Mathematics 121 or placement scores) F, S, SU. Students will use discrete dynamical systems to mathematically model and solve real-world problems. Computer applications will be used extensively.

TO:

131 Mathematical Modeling and Problem Solving (3) (Prerequisite: Grade of C or higher in Mathematics 111 or Mathematics 121 or placement scores) F, S, SU. This course uses mathematics to solve real-world problems. A mathematical model is a representation of a scenario that is used to gain understanding of some real-world problem and to predict future behavior. The modeling cycle encompasses formulating a problem as a mathematical model, analyzing the mathematical model, calculating solutions, and validating results.

RATIONALE:

The new course description better matches the course content as it is currently taught.

M. **CHANGE** on pages 112 of the current catalog

FROM:

134 Probability and Statistics (3) (Prerequisite: Grade of C or higher in Mathematics 111 or Mathematics 121 or placement scores) F, S, SU. Basics of probability, including counting, tree diagrams, conditional probability, binomial and normal distributions, mean, variance, standard deviation, and expected value.

TO:

134 Probability and Statistics (3) (Prerequisite: Grade of C or higher in Mathematics 111 or Mathematics 121 or placement scores) F, S, SU. Elementary topics in probability and statistics are covered, including sampling methods, descriptive statistics, counting and probability, discrete and normal distributions, central limit theorem, confidence intervals, hypothesis testing, simple linear regression, and correlation.

RATIONALE:

The new course description better matches the course content as it is currently taught.

N. **CHANGE** on pages 111 of the current catalog

FROM:

110 College Algebra with Applications (3) (Prerequisite: Placement scores or permission of department; Prerequisite/Corequisite: Mathematics 110L). Study of real numbers and their operations and properties; linear functions, equations, and inequalities; systems of equations; introduction to functions and graphs; and the study of polynomials and their operations. Earns credit toward graduation but will not satisfy any of the six hours of Mathematics in the General Education Requirements. Credit cannot be given for both Mathematics 110 and Mathematics 105.

TO:

105E College Algebra I with Extended Studio (3) (Corequisite: Mathematics 105L) A grade of C or higher in Mathematics 105 (or in Mathematics 105E) is required for the student to advance to Mathematics 111 or Mathematics 121. Mathematics 105E is the equivalent of Mathematics 105 (see catalog description for MATH 105) with a studio component that complements learning experiences by providing additional individualized instruction and assistance with the development of course assignments, emphasizing process, and problem solving. Credit cannot be earned for both Mathematics 105 and Mathematics 105E.

RATIONALE:

Mathematics 110 covers the same content as Mathematics 105 so renaming it as Mathematics 105E removes potential confusion that Mathematics 110 is different or

follows Mathematics 105. The inclusion of “E” on 105E denotes that Mathematics 105E must be taken along with the studio component Mathematics 105L. The revised course description better matches the course content as it is currently taught.

O. **CHANGE** on page 111 of the current catalog

FROM:

110L College Algebra with Modeling (1:3) (Prerequisite/Corequisite: Mathematics 110) Study of algebraic operations, properties of the real number system, data analysis, and problem solving skills to complete a variety of assigned projects and activities involving word problems, linear modeling, and linear programming.

TO:

105L Extended Studio (1:3) (Corequisite: Mathematics 105E) Extended studio time and space for students enrolled in Mathematics 105E. The studio component complements the Mathematics 105E learning experiences by providing additional individualized instruction and assistance with the development of course assignments, emphasizing process and problem solving.

RATIONALE:

Mathematics 110L is renumbered to Mathematics 105L since Mathematics 110 is renumbered to Mathematics 105E. The revised course description better matches the course content as it is currently taught.

P. **CHANGE** on pages 111 of the current catalog

MATHEMATICS

A minimum of six hours in mathematics above **Math 110 and 110L**. Math 105 and Math 110 and 110L are the only math courses that do not count toward the hours of Mathematics in the General Education Requirements. A B.A. degree allows PRS 203 to be substituted for one of these mathematics courses. Students should consult with their academic advisers concerning their mathematics courses.

TO:

MATHEMATICS

A minimum of six hours in mathematics above **Math 105, Math 105E, and 105L. Math 105, Math 105E, and Math 105 L** are the only math courses that do not count toward the hours of Mathematics in the General Education Requirements. A B.A. degree allows PRS 203 to be substituted for one of these mathematics courses. Students should consult with their academic advisers concerning their mathematics courses.

RATIONALE for O-S:

Mathematics 110 and 110L are renumbered to Mathematics 105E and Mathematics 105L, respectively.

7. Proposal from the School of Business

A. **CHANGE** on Page 146 of the 2018-19 Catalog

FROM:

MINOR

A minor is offered in computer science and consists of:

Computer Science 190

Computer Science 226

Computer Science 227

And three additional courses chosen from Computer Science 280 or higher.

A minor is offered in the Software Engineering track and consists of

Computer Science 190

Computer Science 226

Computer Science 227

Computer Science 313

Computer Science 340

MIS 225 or Math **212** or an approved CS elective.

These courses cannot be counted towards more than one of a major, a minor, or collateral within the School of Business.

TO:

B. **CHANGE** on Page 147 of the 2018-19 Catalog

FROM:

COLLATERAL

A collateral in programming requires 12 semester hours in computer science which consists of:

Computer Science 190
Computer Science 226
Computer Science 227
MIS 225 or Math 212 or Computer Science 318.

These courses cannot be counted towards more than one of a major, a minor, or a collateral within the School of Business.

TO:

COLLATERAL

A collateral in programming requires 12 semester hours in computer science which consists of:

Computer Science 190
Computer Science 226
Computer Science 227
MIS 225 or Math 213 or Computer Science 318.

These courses cannot be counted towards more than one of a major, a minor, or a collateral within the School of Business.

Rationale:

Mathematics 212 is being replaced with Mathematics 213. These changes align references to Math 212 with the new Math 213.

C. Page 139 of 2018-2019 Catalog

ADD to the MINOR Section before “A minor in Finance...”

A minor in Economics consists of 18 semester hours as follows:

Economics 203 Introduction to Microeconomics
Economics 204 Introduction to Macroeconomics
Economics 310 Intermediate Microeconomic Theory
Economics 320 Intermediate Macroeconomic Theory
Economics Electives

D. Page 140 of 2018-2019 Catalog

Economics 203 Introduction to Microeconomics

Economics 204 Introduction to Macroeconomics

Economics 310 Intermediate Microeconomic Theory or Economics 320

Intermediate Macroeconomic Theory

Economics Elective

E. Page 146 of the 2018-19 Catalog

CHANGE the section titled Economics completely

FROM

ECONOMICS

Coordinator: Dr. Ben L. Kyer

The School of Business offers three degree programs in economics: (1) a Bachelor of Business Administration degree program with a major in business economics, (2) a Bachelor of Science degree program with a major in economics, and (3) a Bachelor of Arts degree program with a major in economics. The requirements for the Bachelor of Business Administration degree are described earlier in this chapter. The requirements for the Bachelor of Science and Bachelor of Arts degrees appear below. A complete listing of courses in economics begins on page 142.

MAJOR

The Bachelor of Science degree with a major in economics requires the following:

1. Twenty seven semester hours above Economics 203 and 204, including Business 305 and Economics 310, 320, and 450
2. Completion of two semester of mathematics, including Mathematics 134
3. English 305
4. Minor/collateral requirements (two options) a) two 12-hour collaterals approved by the faculty adviser b) an 18-hour minor approved by the faculty adviser

To earn a Bachelor of Arts degree with a major in economics, a student must satisfy all requirements for the Bachelor of Science degree and complete a foreign language through 202. The minimum number of semester hours required in major courses for a major in economics is 30. The minimum number of semester hours in all courses (major and non-major) required for the major in economics is 120.

MINOR

A minor in economics requires 18 semester hours and must include Economics 203, 204, 310, and 320.

COLLATERAL

A collateral in economics requires 12 semester hours and must include Economics 203, 204, and either 310, or 320.

TO

ECONOMICS

Coordinator: Dr. Ben L. Kyer

NOTE: Students are no longer permitted to declare the BS or BA in Economics as a major. Students who are currently registered in the BS or BA in Economics should discuss their completion plan with their advisor

The School of Business offers three degree programs in economics: (1) a Bachelor of Business Administration degree program with a major in business economics, (2) a Bachelor of Science degree program with a major in economics, and (3) a Bachelor of Arts degree program with a major in economics. The requirements for the Bachelor of Business Administration degree are described earlier in this chapter. The requirements for the Bachelor of Science and Bachelor of Arts degrees appear below. A complete listing of courses in economics begins on page 142.

MAJOR

The Bachelor of Science degree with a major in economics requires the following:

1. Twenty seven semester hours above Economics 203 and 204, including Business 305 and Economics 310, 320, and 450
2. Completion of two semester of mathematics, including Mathematics 134
3. English 305
4. Minor/collateral requirements (two options) a) two 12-hour collaterals approved by the faculty adviser b) an 18-hour minor approved by the faculty adviser

To earn a Bachelor of Arts degree with a major in economics, a student must satisfy all requirements for the Bachelor of Science degree and complete a foreign language through 202. The minimum number of semester hours required in major courses for a major in economics is 30. The minimum number of semester hours in all courses (major and non-major) required for the major in economics is 120.

Rationale: Due to low enrollments the BS/BA major in Economics is discontinued

The MLE 317 course is specific to the teaching of middle-level students rather than elementary students. This is to fix an incorrect wording.

J. MODIFY from page 148 under “Education Courses (EDUC)” of the current catalog the following:

FROM:

391 Clinical Experience B: Early Childhood - Block B (2:1-3) (Prerequisite: Admission to the Professional Education Program) F, S. Students are required to observe and teach preschool and primary level children at designated schools. More specifically, students are to record, analyze, and assess children’s emotional, intellectual, physical, and social behaviors. Special attention is given to the diagnosis of emotional, intellectual, social, and physical problems. Using the collected data, each student plans and implements lessons that address a child’s developmental needs in the emotional, intellectual, social, and physical areas. The unit should also include a number of activities through which children’s language skills are developed. Students interact with individual and groups of parents, as well. This course requires a minimum of 40 hours in clinical experience in public schools. To complete the field experience hours, a current SLED background check must be received and approved by the FMU School of Education. Students should check the “News and Announcements” webpage (www.fmarion.edu/education/soenews/) for specific SLED background check deadlines. This course is to be taken in the semester prior to student teaching.

TO:

391 Clinical Experience B: Early Childhood - Block B (2:1-3) (Prerequisite: Admission to the Professional Education Program, EDUC 311 and ECE 329) F, S. Students are required to observe and teach preschool and primary level children at designated schools. More specifically, students are to record, analyze, and assess children’s emotional, intellectual, physical, and social behaviors. Special attention is given to the diagnosis of emotional, intellectual, social, and physical problems. Using the collected data, each student plans and implements lessons that address a child’s developmental needs in the emotional, intellectual, social, and physical areas. The unit should also include a number of activities through which children’s language skills are developed. Students interact with individual and groups of parents, as well. This course requires a minimum of 40 hours in clinical experience in public schools. To complete the field experience hours, a current SLED background check must be received and approved by the FMU School of Education. Students should check the “News and Announcements” webpage (www.fmarion.edu/education/soenews/) for specific SLED background check deadlines. This course is to be taken in the semester prior to student teaching.

RATIONALE:

The addition of the pre-requisite of EDUC 311 ensures that students have taken the course on instructional planning prior to EDUC 391 where they will be teaching lessons in their field placement. The addition of the pre-requisite of ECE 329 ensures that students are not taking two courses requiring extensive hours in field experience in the same semester.

K. MODIFY from page 148 under “Education Courses (EDUC)” of the current catalog the following:

394 Clinical Experience: Middle Level (2:1-3) (Prerequisite: Admission to the Professional Education program; Prerequisite: EDUC 311 and EDUC 313; at least one middle level methods course [Middle Level Education 315, 316, or 317] must be a prerequisite or a corequisite). This course is designed to provide middle level education majors with practical experiences in public middle schools. Middle level candidates will focus on examining how content can best be presented to early adolescent students and preparation for the Student Learning Objective (SLO) project. This course will require a minimum of 40 hours in clinical experience in public schools. To complete the field experience hours, a current SLED background check must be received and approved by the FMU School of Education. Students should check the “News and Announcements” webpage (www.fmarion.edu/education/soenews/) for specific SLED background check deadlines. This course is to be taken in the semester prior to student teaching.

RATIONALE:

The addition of the pre-requisite of EDUC 311 ensures that students have taken the course on instructional planning prior to EDUC 394 where they will be teaching lessons in their field placement. The addition of the pre-requisite of EDUC 313 ensures that students are not taking two courses requiring extensive hours in field experience in the same semester. Additionally, the course project has changed from the Teacher Candidate Work Sample to the Student Learning Objective (SLO) project in this course and in student teaching. The change to the catalog is to reflect this change in assignments.

M. MODIFY from page 149 under “Education Courses (EDUC)” of the current catalog the following:

FROM:

421 Behavior Management (3) (Prerequisite: Admission to Professional Education Program). This course is designed for prospective teachers with a concentration in learning disabilities. The course focuses on preventing problem behaviors in the classroom by helping teachers structure the learning environment, build positive relationships with students, and provide effective instruction to reduce problem behaviors. Participants will also learn strategies to help students make better behavioral choices. Evidence-based prevention and intervention techniques will be discussed and participants will learn strategies for responding to inappropriate behaviors when they do occur in the classroom.

TO:

421 Behavior Management (3) (Prerequisite: EDUC 420). This course is designed for prospective teachers with a concentration in learning disabilities. The course focuses on preventing problem behaviors in the classroom by helping teachers structure the learning environment, build positive relationships with students, and provide effective instruction to reduce problem behaviors. Participants will also learn strategies to help students make better behavioral choices. Evidence-based prevention and intervention

techniques will be discussed and participants will learn strategies for responding to inappropriate behaviors when they do occur in the classroom.

RATIONALE:

Currently, Elementary Education majors can take any of their concentration courses in subjects of English, Foreign Language, Mathematics, Science, and Social Studies prior to application to the education program. However, students who choose Learning Disabilities as a concentration cannot take EDUC 421, 423, and 425 until they have been accepted into the program. Changing the pre-requisite from program acceptance to the EDUC 420 course, which is available to take before program acceptance, allows all Elementary Education students to have the same ability to take concentration courses prior to program acceptance.

N. MODIFY from page 149 under “Education Courses (EDUC)” of the current catalog the following:

FROM:

423 Characteristics of Learning Disabilities (3) (**Prerequisite: Admission to Professional Education Program**). This course is designed for prospective teachers with a concentration in learning disabilities. It considers the academic, social, emotional, and behavioral aspects of learning disabilities, and how curriculum, instruction, and other forms of support might be theorized and organized in ways that are most supportive to students with learning disabilities. This course will also examine how services for students with learning disabilities are implemented in public school settings.

TO:

423 Characteristics of Learning Disabilities (3) (**Prerequisite: EDUC 420**). This course is designed for prospective teachers with a concentration in learning disabilities. 11. Proposal from the School of Health Sciences, Nursing Department

A. **ADD** on page 201 of current print catalog, in order by number

608 Clinical Nursing Education (3) SU This course discusses teaching/learning theory as it relates to clinical nursing education. It facilitates understanding of teaching strategies and methods of evaluation that can be utilized in the laboratory and/or clinical practice setting. Learners will develop skills needed by the clinical nurse educator in the academic environment and practice setting. This course is designed to prepare the learner for the role of clinical nurse educator.

RATIONALE:

This course will be part of the curriculum for the Nurse Educator degree and the Nurse Educator certificate option. This course is designed to prepare students for the role of clinical nurse educator, which many of our Nurse Educator and FNP students pursue. This will be replacing EDUC 621: Understanding Learning

Differences in the curriculum since this new course is needed to better achieve student learning outcomes for this degree/certificate option.

B. **MODIFY** on page 200 of current print catalog, column 1, middle of page

FROM:

The FMU MSN/Nurse Educator track has been developed ~~as an innovative, collaborative track with the Graduate School of Education~~ in response to national and regional needs for nurse educators.

TO:

The FMU MSN/Nurse Educator track has been developed in response to national and regional needs for nurse educators.

RATIONALE:

Courses from the School of Education are no longer part of the MSN Nurse Educator degree option so this statement is being changed for accuracy.

RATIONALE:

This is a correction to the courses offered as part of the MSN Nurse Educator plan of study.

D. **MODIFY** on page 200 of current print catalog, column 2, middle of page

FROM:

To receive a Certificate in Nursing Education from FMU, a student must meet the following requirements:

1. Complete nine (9) graduate credit hours
 - a. APRN 604 Teaching and Learning in Nursing
 - b. APRN 605 Curriculum Development and Program Evaluation
 - c. **APRN 607 Assessment and Evaluation Strategies**

TO:

To receive a Certificate in Nursing Education from FMU, a student must meet the following requirements:

1. Complete nine (9) graduate credit hours
 - a. APRN 604 Teaching and Learning in Nursing
 - b. APRN 605 Curriculum Development and Program Evaluation
 - c. **APRN 608 Clinical Nursing Education**

RATIONALE:

This is a correction to the courses offered as part of the Nurse Educator Certificate program. The new course (APRN 608) is more relevant to the students who earn this certificate, since many will become future clinical nurse educators.

12. Proposal from the School of Health Sciences, Speech Language Pathology Program

A. MODIFY PAGE 208 in the online Catalog and page 217 in paper Catalog

FROM:

SLP 520: Structured Clinical Observation and Pre-Clinical Simulation Experiences

(1) This course provides guided clinical observations and simulation experiences under the supervision of an **ASHA** Certified Speech-Language Pathologist. This course will help prepare students for working with pediatric and adult populations with communication and swallowing disorders.

SLP 530: Survey of Articulation and Phonological Disorders in Children and Across the Lifespan (2) A survey of the assessment and treatment procedures used in the case management of articulation and phonological disorders in children as well as others struggling with articulation and phonology disabilities across the life span.

TO:

520 Structured Clinical Observation and Pre-Clinical Simulation Experiences (1) This course provides guided clinical observations and simulation experiences under the supervision of an **American Speech-Language-Hearing Association (ASHA)** Certified Speech-Language Pathologist. This course will help prepare students for working with pediatric and adult populations with communication and swallowing disorders.

530 Speech Sound Disorders (2) This course provides an overview of potential etiologies and characteristics of speech sound disorders in children and adults. Students will learn to use evidence-based assessment, diagnosis, and treatment for articulation and phonological disorders across the lifespan.

RATIONALE:

- Spell out ASHA for clarity
- The name of 530 has been changed to better reflect current SLP practice.
- The course description of 530 was also changed to reflect the content that is needed in the course so students are prepared to practice upon graduation.

B. MODIFY

FROM:

SLP 550: Beginning Clinical Practicum (1) This course provides clinical practice in the diagnosis and treatment of communication disorders. Clinical work is accompanied by regular group and individual meetings with clinical staff. Clinical hours are accumulated under direct supervision. Acceptable clinical hours may be applied toward **ASHA** certification.

TO

550 Clinical Practicum I (1:0-2) This course provides clinical practice in the diagnosis and treatment of communication disorders. Clinical work is accompanied by regular group and individual meetings with clinical staff. Clinical hours are accumulated under direct supervision. Acceptable clinical hours may be applied toward **American Speech-Language-Hearing Association (ASHA)** certification.

RATIONALE:

- Clarifying laboratory (clinical hours) at a 2:1 ratio so students and faculty understand expectations of the courses.

- Aligning spelling and disorder nomenclature to reflect terminology preferred by ASHA
- Changing course title.

C. MODIFY PAGE 208 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 580: Clinical Practicum (2) This course continues the practice of diagnosis and treatment of communication disorders. Clinical work is accompanied by regular group and individual meetings with clinical educators. Clinical hours are accumulated under direct supervision of ASHA Certified Clinical Educators. Acceptable clinical hours may be applied toward **ASHA** certification.

TO:

580 Clinical Practicum II (2:0-4) This course continues the practice of diagnosis and treatment of communication disorders. Clinical work is accompanied by regular group and individual meetings with clinical educators. Clinical hours are accumulated under direct supervision of ASHA Certified Clinical Educators. Acceptable clinical hours may be applied toward **American Speech-Language-Hearing Association (ASHA)** certification.

RATIONALE:

- Clarifying laboratory (clinical hours) at a 2:1 ratio so students and faculty understand expectations of the courses.
- Spell out initials for clarification.
- Changing course title.

D. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

SLP 581: Hearing Clinical Practicum (1) This course provides students with the opportunity to conduct hearing screenings and basic auditory processing measures for children and adults under the supervision of an audiologist or speech-language pathologist, following protocols established by **ASHA**.

TO:

581 Hearing Clinical Practicum (1:0-2) This course provides students with the opportunity to conduct hearing screenings and basic auditory processing measures for children and adults under the supervision of an audiologist or speech-language pathologist, following protocols established by **American Speech-Language-Hearing Association (ASHA)**.

RATIONALE:

- Clarifying laboratory (clinical hours) at a 2:1 ratio so students and faculty understand expectations of the courses.
- Spell out initials for clarity.

E. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 591: Motor Speech Disorders (3) This course provides an examination of the neurological basis, assessment, and treatment of dysarthria and apraxia. Students will be introduced to the appropriate procedures for evaluation and intervention of children and adults with motor speech disorders.

TO:

591 Motor Speech Disorders (3) This course examines the neurological bases, assessment, and treatment of dysarthria and apraxia of speech. Students will learn the perceptual and instrumental procedures used to evaluate and treat motor speech disorders across the lifespan.

RATIONALE:

- Changing course descriptions to clarify course content.

F. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 601: Advanced Clinical Practicum I (Varies) (Prerequisite SLP 580) This course provides guided clinical observations and clinical experiences under the supervision of an **ASHA** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

TO:

601 Clinical Practicum III (3:0-6) (Prerequisite SLP 580) This course provides guided clinical observations and clinical experiences under the supervision of an **American Speech-Language-Hearing Association (ASHA)** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

RATIONALE:

- Clarifying laboratory (clinical hours) at a 2:1 ratio so students and faculty understand expectations of the courses.

- Spelling out initials.
- Changing course title.

G. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 607: Augmentative/Alternative Communication (1) This course provides fundamental knowledge of the principles and functions of augmentative and alternative communication. The course will provide students with the skills required to assess the needs of a variety of communicatively impaired populations and determine the best treatment strategies for patients/ students and/or clients who would benefit from augmentative/alternative communication devices/methods.

TO:

607 Augmentative and Alternative Communication (1) This course develops an awareness of augmentative and alternative communication strategies for individuals with temporary or permanent severe speech and/or language disorders. This course presents no-, low-, and high-technological strategies for a broad range of cognitive, learning, physical, and sensory disabilities. This course also discusses literacy, learning, training, transition, funding, and interdisciplinary teaming as potential challenges to implementation and emphasizes clinical skills for comprehensive assessment and management.

RATIONALE:

- Changing course descriptions to clarify course content.
- Changing course title to better reflect that it can be both forms of communication

H. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 617: Fluency Disorders (1) This course explores the theoretical and diagnostic approaches to the modification of stuttering behavior. Students will learn to identify normal and abnormal dysfluency as it relates to speech production, and will learn to assess and diagnose fluency of speech across the lifespan.

TO:

617 Fluency Disorders (1) This course explores the theoretical and diagnostic approaches to the modification of speech disfluencies. Students will learn to identify typical and atypical disfluencies as they relate to speech production, and will learn to assess and diagnose stuttering and cluttering across the lifespan.

RATIONALE: Changing course descriptions to clarify course content.

I. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 620: Advanced Clinical Practicum II (3) (Prerequisite: SLP 601) This course provides guided clinical observations and clinical experiences under the supervision of an **ASHA** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

SLP 621 Advanced Clinical Practicum III (6) (Prerequisite: 620) This course provides guided clinical observations and clinical experiences under the supervision of an **ASHA** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

TO:

620: Clinical Practicum IV (5:0-10) (Prerequisite: 601) This course provides guided clinical observations and clinical experiences under the supervision of an **American Speech-Language-Hearing Association (ASHA)** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

621 Clinical Practicum V (6:0-12) (Prerequisite: 620) This course provides guided clinical observations and clinical experiences under the supervision of an **American Speech-Language-Hearing Association (ASHA)** Certified Speech-Language Pathologist. This course will help prepare students for working with clients, patients, and students with communication and/or swallowing disorders. Acceptable clinical hours may be applied toward ASHA certification.

RATIONALE:

- Spelling out ASHA
- Changing name
- Writing out laboratory hours and increasing laboratory hours

J. MODIFY PAGE 209 in the online Catalog and page 218 in the paper Catalog

FROM:

SLP 635: Instrumentation in Speech-Language and Hearing Sciences (3) This course is designed to provide information to and to develop skills in students of Speech Pathology/Audiology and related disciplines which will assist them in the understanding, application, and selection off speech analysis instrumentation which may be used by speech and hearing professionals in the research, diagnosis and/or management of various speech

disorders. Major emphasis will be focused on an acoustic phonetic approach to describing and quantifying human speech communication. Basic electronics and physics concepts will be employed throughout the course and will be discussed where necessary.

TO:

635 Instrumentation in Speech-Language and Hearing Sciences (3) This course will provide students with information and experience selecting and using instrumentation appropriate for diagnosis, assessment, management, and research in communication disorders. Emphasis will be placed on clinical application. Basic electronics and physics concepts will be discussed and employed throughout the courses.

RATIONALE: Changing course descriptions to clarify course content.

K. ADD: PAGE 206 in online Catalog and 218 in paper Catalog

645a Speech-Language-Hearing Guided Clinical Elective (1:0-2) (Permission of the program Director) This course provides senior students with an opportunity to exercise initiative, independence, and creativity in pursuing a clinical area of interest or need in speech-language-hearing pathology. The learning outcomes, proposed schedule, site, and method of evaluation, as well as the preceptor, will be chosen by the student in collaboration with faculty. A maximum of four (4) credit hours or eight (8) clinical/practicum hours may be earned towards graduation. This course can be repeated twice with permission of the program Director.

645b Speech-Language-Hearing Guided Clinical Elective (2:0-4) (Permission of the program Director) This course provides senior students with an opportunity to exercise initiative, independence, and creativity in pursuing a clinical area of interest or need in speech-language-hearing pathology. The learning outcomes, proposed schedule, site, and method of evaluation, as well as the preceptor, will be chosen by the student in collaboration with faculty. A maximum of four (4) credit hours or eight (8) clinical/practicum hours may be earned towards graduation. This course can be repeated twice with permission of the program Director.

645c Speech-Language-Hearing Guided Clinical Elective (3:0-6) (Permission of the program Director) This course provides senior students with an opportunity to exercise initiative, independence, and creativity in pursuing a clinical area of interest or need in speech-language-hearing pathology. The learning outcomes, proposed schedule, site, and method of evaluation, as well as the preceptor, will be chosen by the student in collaboration with faculty. A maximum of four (4) credit hours or eight (8) clinical/practicum hours may be earned towards graduation. This course can be repeated twice with permission of the program Director.

RATIONALE:

- This course will provide students with the option of earning the clinical/ practicum hours they need for ASHA certification.
